Art Unit: 2833

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Wagner 6,190,193.

Wagner discloses base portion 16, projecting portion 20, turned portion 14, and tail portion 6, wherein boundary Z4 between the base portion and the turned portion is substantially parallel to boundary 12 between the base portion and the tail portion. Note that all recitations directed to the PGA are intended use and thus not given patentable weight.

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: neither Wagner nor the other prior art of record discloses or teaches the use of the claimed contact in conjunction with a PGA socket as claimed.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2833

Claim 4 depends from canceled claim 2 and thus cannot be further examined on its merits.

The other references cited on Form 892 disclose contacts with similar structure.

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
